

# Islet Isolation

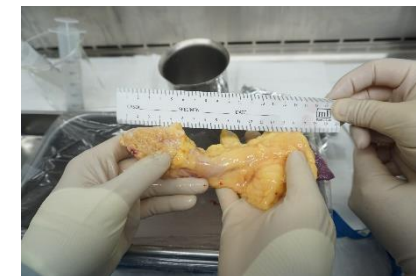

| HPAP204                                    |                                                             |
|--------------------------------------------|-------------------------------------------------------------|
| Date of Procurement/Cross Clamp Time       | 2/17/2026, 01:37 (EST)                                      |
| Date/Time Tissues Biopsy & Islet Isolation | 2/17/2026, 14:43 (EST)                                      |
| Date/Time Intra Ductal Enzyme Infusion     | 2/17/2026, 15:41 (EST)                                      |
| <sup>1</sup> Cold Ischemia Time (CIT)      | 14 hrs and 04 mins                                          |
| <sup>2</sup> DCD Donor Warm Ischemia Time  | NA                                                          |
| Pancreas Condition                         | Damaged and Partial pancreas                                |
| Pancreas Weight (trimmed)                  | 33.7 g                                                      |
| Total Islet Yield                          | 33,786 IEQ                                                  |
| <sup>3</sup> IEQ/g of Pancreas             | 1002.6 /g                                                   |
| Islet Purity (%) & Yield (IEQ)             | <sup>4</sup> Purity (40%): 7,668 (5%): 26,118               |
| Islet Viability (%)                        | 96                                                          |
| GSIR (SI)                                  | 0.41                                                        |
| DNA Content (ng/IEQ)                       | 0.48                                                        |
| Endotoxin (EU/ml)                          | 0.101                                                       |
| Sterility Test                             | Negative<br>(No Growth Of Bacteria Or Fungus After 14 Days) |

<sup>1</sup>CIT = duration from Cross clamp time till Intra ductal enzyme infusion

<sup>2</sup>DCD = Donation after Cardiac Death (circulatory arrest)

<sup>3</sup>IEQ/g = Islet equivalent per gram of pancreas = Total isolated islets / Weight of pancreas

<sup>4</sup>High = >70%, Middle = 50%– 69%, Low = 30% - 49%

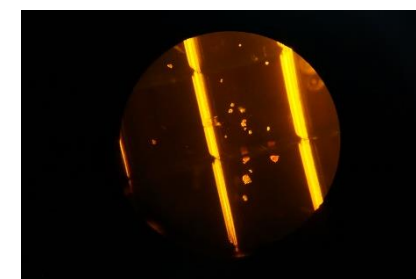

**Pancreas (Pre trimming)**

**Pancreas (Post trimming)**

**Islets in culture media (Day 1)**

**DTZ staining (Day 1)**
